services

collaborative client  
focused approach

# TECHNOLOGY INNOVATORS

Our business-enabling transformations impact people, communities and industries throughout the U.S. and around the world. As a recognized technology innovator with Fortune 500 companies, GalaxE is responsible for the growth and success of many industries, including:

## HEALTHCARE

With expertise in all aspects of healthcare, we provide consulting, application development and data modeling solutions for the all key players in the value chain.

## PHARMA & LIFE SCIENCES

Our clients include commercial businesses, organizations and institutions licensed to research, develop, market and/or distribute prescription drugs or medical devices.

## FINANCIAL SERVICES

Specializing in keeping data secure, we optimize digital-ready infrastructures including networks, datacenters and collaboration environments and focus on effective and tailored mobile and cloud-based solutions.

## RETAIL & MANUFACTURING

Deep industry-solution experience ranging from portal development, product lifecycle management, supply chain management, to point of sale and financial solutions.

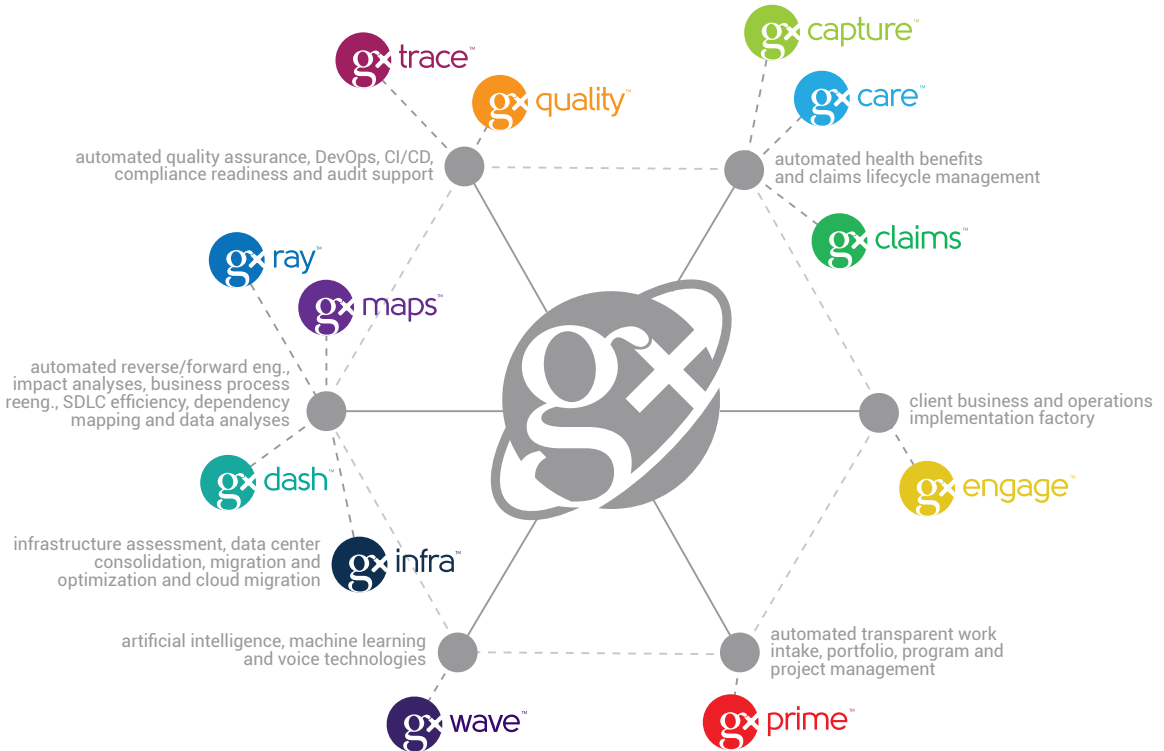

## SPORTS & ENTERTAINMENT

Solutions for some of the biggest names in sports and entertainment ranging from data warehouse, SAP, website optimization and more.

# HOME OF THE Gx ACCELERATORS

You join an exclusive group of visionaries when you engage our automation acceleration approach. With data-driven automation, your enterprise can quickly maximize knowledge and reduce costs over time. Stay in front of market demand by automating business know-how that shifts talent focus from process to strategic initiatives.

**SUCCESS. POWERED BY GALAXE.**

# ENTERPRISE WIDE TRANSFORMATION

Opportunity for technical innovation and value-driven performance are realized in a broad range of IT initiatives. With broad spectrum command of language viewed through an agnostic technology lens, we bring expertise to design, development and deployment that put client business goals ahead of everything else.
